**Iron:** Iron is deadly to Tuatha, it can poison the blood, something only a blood transfusion can fix. It can also make a wound become infected or not heal right. Tuatha are basically allergic to Iron, it is an item not found in their blood or anywhere in their bodies like it is in humans. As such this has caused such rivalries between the humans and dwarves with their dealings with the Tuatha. Humans use iron in so many things that Tuatha can be offended by the most minute object offered them by a human. The dwarves spend their time mining iron and smelting it more than even the humans and some of the runoff from their smelting camps has polluted streams that run through Tuatha lands. Iron also weakens Tuatha in such a way that their regenerative abilities are disabled for a few days from receiving a wound with iron.
