Biography

Personality

Abilities/Skills

- **Electricity and Ion Manipulation (Electrokinesis):** Marie has the ability to generate and direct the flow of electrons, which allows her to adjust resistivity, current, and voltage through a given conductor as well as control magnetic fields. Manipulating ions allows her to use air as a conductor, and make various ranged attacks. This ability consumes a lot of energy, requiring Marie to eat almost twice that much a normal person needs. This ability also tends to respond more to stress and anger, which causes electrical sparks to jump from her body at times.
- **Engineering:** To take better advantage of her ability, Marie has studied extensively on the properties of electricity and electromagnetic fields. This has had the side effect of her learning principles of engineering and as a result she can perform repair on most technical things given time.

Items

- Several outfits packed in a suitcase. Many are somewhat worn out, given that a tailor for someone of her size is difficult to afford on a minimal budget.
- A 10mm kinetic, ballistic pistol for self-defense. She barely knows how to use it, though.
- A seemingly endless supply of snacks as far as most people can tell. She's almost always eating *something*.
- A personal electronic map noting most known star systems and other spacemarks[1]
- An assortment of knick-knacks and other memorabilia-like items of no real value outside of the sentimental.
- A small, easy-to-remove poster of some cool stealth fighter, dramatized.
