

Arcadia Complex

Old stories pass by curious minds, speaking of a noble avian Republic so grand, it once held whole worlds in it's palm. Some say they came from above, others below.— Tall tales tell of their undoing: their grip crumbled as their own people and ancient enemies revolted upon their own governors, lead by a faceless Baron. The verses sing that their collapse was so mighty, the remnants of their ancient Empire was blasted far and wide across many uncharted spaces.— Whispers in the streets speak of troves of unclaimed treasure, and bounties of forgotten technology to be uncovered. The allure of riches and the search for answers that such mad tales instill can attract those just as mad themselves.

Arcadia Complex is a roleplaying plot hosted by [Pancakei](#) that follows the adventures of [Dahlia Morgan](#) and her crew of mercenaries, lost souls, and scholars chasing down the legends of Arcadia aboard the ISS Downrider.
